

SW696
Social Work Practice with Children and Youth
Sp/Su 2012

Prof. Julie Ribaldo
2784 SSWB **Office: 734.936.4949**
 Email: jribaldo@umich.edu

Office hours - **Monday 12:15-3:00**
 Others by appointment – Please see me or email me to schedule a time.

**"What is done to children, they will do to society."
- Karl A. Menninger**

1. Course Description:

This advanced level methods course in the Children and Youth in Families and Societies concentration builds upon the foundation level practice methods course and prepares students for employment in the many human service delivery systems which address the needs of children, youth, and their families. This cross-cutting skills course encompasses both direct/micro (i.e., assessment, intervention, prevention) and mezzo and macro (program design, evaluation, administration, community organization, policy analysis) practice methods used to address problems presented by or to children and youth in a variety of contexts. The development of social work skills, values, and ethics applicable to promotion, prevention, intervention, remediation and social rehabilitation activities with diverse child and youth populations at all levels of intervention will be emphasized. Evidence-based change interventions that build on strengths and resources of children and their families at all levels of intervention will be examined in order to develop socially just and culturally-competent policies and practice. This course will address the key diversity dimensions (including ability, age, class, color, culture, ethnicity, family structure, gender (including gender identity and gender expression), marital status, national origin, race, religion or spirituality, sex, and sexual orientation) as it relates to children, youth and their families.

2. Course Content:

Effective social work practice with children and youth requires a developmentally-sensitive, resiliency focused multisystems approach, an emphasis on prevention and early intervention, and the collaborative involvement of families, other primary caretaking adults, and involved professionals, in the identification, development, delivery, and evaluation of services. In addition to being able to assess and intervene with children and youth, social workers must also develop the skills necessary to assess the resources and the risk factors which may exist in the child's or youth's family, neighborhood, community, and in the larger social environment. In this course the emphasis of intervention is as much on the context as on the individual. Intervention strategies focus on ways to bring about change at levels such as the classroom or school, the

peer group, and the community or population, as well as at the individual level. Mezzo and macro practice skills covered in this course are aimed at promoting interpersonal competence, self-esteem, self-efficacy, achievement, and moral development in children and youth by making the contexts within which they develop more responsive to their developmental needs.

Direct practice methods covered in this course provide students with the skills necessary to select and provide effective short-term interventions, evaluate direct practice, develop service delivery systems and work effectively with individuals, families and groups in families, institutions and communities. Skills for engagement, assessment, intervention, prevention, and evaluation relevant to contexts such as families, neighborhood and community, schools, group care facilities, residential care, hospitals, correctional programs and institutions, courts, governmental and nongovernmental agencies will be covered. Intervention strategies may be derived from a variety of approaches and theoretical perspectives, self-help and peer support, group work, family life education, empowerment models, and family preservation. Students will learn to use evidence-based knowledge and skills to engage and communicate effectively with children and youth, families and community members, and other service providers. Assessment skills taught will emphasize the importance of being able to identify special needs, abuse and neglect, family violence, substance abuse, and circumstances of extreme stress, danger, or deprivation, and accurately assess the level of risk these circumstances present for the children or youths concerned. The student will learn how to design individual programs of intervention that are based on clearly articulated goals and priorities, reflect an examination of the evidence base and are consistent with social work ethics and values. Throughout the course, cultural competence and sensitivity to differences among families and the impact of worker/client differences in values, experiences, and power will be analyzed. In addition, the student will learn to understand the significance of “multiple identities” (the interaction of factors such as the diverse dimensions: including ability, age, class, color, culture, ethnicity, family structure, gender (including gender identity and gender expression), marital status, national origin, race, religion or spirituality, sex, and sexual orientation) in shaping the uniqueness of families and individuals and in shaping power and privilege differences.

Mezzo and macro practice methods covered in this course include skills applicable to the areas of community organization and development, administration, policy and planning, and research and evaluation in order to support the strengths of diverse children, families and communities and to promote social justice. Presentation of material from these areas recognizes the importance of working with multidisciplinary teams, service delivery agencies, and formal and informal community systems, in order to obtain necessary resources and support services for children and youth. Specific skills addressed include advocacy, needs assessment, working collaboratively with community agency and groups, administrative and supervisory issues impacting service delivery, budgeting and fiscal issues, program design and development, program and practice research and evaluation, and child and youth policy analysis.

3. Course Objectives:

1. Students will demonstrate advanced-level skills in translating and applying a developmentally sensitive, resiliency focused, collaborative, multisystems intervention perspective in working with diverse populations of children and youth, families and communities.

- Effectively communicate with and establish developmentally sensitive, culturally appropriate collaborative relationships with children, youth, their families, and other significant members of their social environments in every level of social work intervention.
- Develop and implement a practice vision of social justice
- Apply socially just interventions that maintain strengths-based and resiliency perspectives.

- Become familiar with belief systems and cultural practices of children, youth, and their families with whom they work by asking relevant questions in order to understand their needs within the context of these practices.
- Apply collaboration building and consultation skills within and across child and youth serving organizations to strengthen families and organize communities in response to the program practice and policy needs of diverse populations of children and youth in different child-serving settings.
- Specify how risks, protective and promotive factors that contribute to child and youth safety, health, security and well-being.
- Effectively seek out needed information and become familiar with formal and informal resources available to meet the diverse needs of children, youth and their families.

2. Students will demonstrate advanced skill in using evidence-based prevention, intervention and rehabilitation practice guidelines to develop micro, mezzo and macro interventions that address child, youth, family and community goals and priorities.

- Develop evidence-based change interventions that build on child, youth, family and community strengths and resources at the micro, mezzo and macro system levels.
- Incorporate social work values and ethical principles in planning and implementing interventions for children and youth and their families.
- Use relevant child, youth and family policy initiatives, laws and judicial decisions to advocate for improvements in the delivery of interventions that support the strengths of diverse child, youth, family, and community systems and promote social justice.
- Develop and apply change interventions that a) differentiate within and between social categories; b) maintain strengths-based and resiliency perspectives; c) promote dialogue across social and cultural differences.
- Critique the applicability of current knowledge, research and evidence based practice methods in work with diverse populations of children, youth and their families who live in communities where they experience discrimination and oppression due to the diversity dimensions.
- Create a logic model or concept map describing connections between child, youth, family and community focused practice model with goals, objectives, activities, outcomes and evaluation approach.

4. Course Design:

This course instructor will select readings and design assignments for the course. Various classroom teaching strategies may be used, including lecture, multimedia presentations, small and large group discussion, presentations by students and guest lecturers, role plays, and experiential exercises. Students' experiences in the field will be utilized as much as possible in assignments and case presentations and discussions.

5. Relationship of Course to Four Curricular Themes:

• *Multicultural and diversity issues* will be emphasized throughout this course, not only in relationship to direct intervention with children and youth and their families and communities, but also in regard to the need to develop and maintain effective collaborative relationships with other community resources and service providers. Students will learn to recognize the existence of group differences in a number of areas (such as nonverbal communication, individual and family values, family and community structures, preferred and accepted responses to crisis,

response to exclusion or oppression) and how these may impact intervention relationships with children, youth, and their families.

- *Social change and social justice issues* will be addressed in relationship to children and youth as populations who experience vulnerability due to developmental and status factors (i.e., age and dependence), in addition to other impacts they may experience due to membership in other groups which encounter exclusion and discrimination. In recognition of this, abuses of power within the family (i.e., domestic violence, physical and sexual abuse and exploitation) will be addressed as issues related to social justice and human rights, and not just as indicators of individual and family psychopathology. Advocacy for children and youth, especially those whose families and communities are particularly impacted by social inequality and social injustice, will be emphasized at individual, family, organizational, community, and policy levels.
- *Promotion and prevention* are particularly important for child and youth populations, due to the increased likelihood of negative outcomes as services or interventions are delayed, and the “time-limited” nature of childhood and youth. These areas are addressed in the micro practice areas through family life education, family preservation activities, screening early identification of children at risk, and family and community based early intervention with children and youth in a variety of context. At the mezzo and macro practice levels, program development and evaluation, staff and professional training, fiscal and economic issues and policy analysis addresses the relationship between policy decisions and risks to children and youth.
- *Social science knowledge* is presented as the necessary basis for conducting empirically grounded assessment, intervention and evaluation practice at all levels of intervention. Course materials draw upon research knowledge from a variety of social sciences, as well as other professions and disciplines (i.e., social work, medicine, psychology, sociology, economics, law, etc.), and emphasize the need for multidisciplinary collaboration and communication around issues related to children and youth and their ecosystems. Social science research concepts and methods are described in relationship to both social work practice and program and policy evaluation processes.

6. Relationship of this course to Social Work Ethics and Values:

Practice with children and youth requires considerable attention to issues of ethics and values, due to the special challenges these populations offer the social work practitioner. For example, confidentiality cannot be maintained when suspected child abuse or neglect must be reported, and issues of self-determination and autonomy often arise when an adolescent discloses important information that has not been shared with a parent or other responsible adult. Social work values and social science knowledge may also conflict with the child-rearing beliefs and practices of some cultural or religious groups. Resource limitations or lack of training or sensitivity may result in inappropriate treatment for some children or youth and their families, and others may be excluded entirely. Finally, social policy decisions significantly affect the lives of children and youth, the stability of their families and communities, and their access to resources and services. This course emphasizes, in relationship to each of the substantive areas outlined above, the importance of examining the complexities of ethical and value issues as they apply to the problems of children and youth. Social work values and ethics, as outlined in the professional Code of Ethics, are presented as the necessary and appropriate guidelines for practice when ethical dilemmas arise in social work practice.

7. Intensive Focus on Privilege, Oppression, Diversity and Social Justice (PODS):

This course integrates PODS content and skills with a special emphasis on the identification of theories, practice and/or policies that promote social justice, illuminate injustices and are consistent with scientific and professional knowledge. Through the use of a variety of instructional methods, this course will support students developing a vision of social justice,

learn to recognize and reduce mechanisms that support oppression and injustice, work toward social justice processes, apply intersectionality and intercultural frameworks and strengthen critical consciousness, self knowledge and self awareness to facilitate PODS learning.

Course Texts

Required:

Perry, B. and Szalavitz, M. (2006). *The Boy Who Was Raised as a Dog*. Basic Books
Schiraldi, G.R. (2009). *The Post-Traumatic Stress Disorder Sourcebook*. McGrawHill

SW 696 Spring /Summer 2012 Course Requirements

Attendance and Participation - 10 points

- Participation can be a verbal and/or non-verbal action. I will also be looking at the interest in and respect you show other students.
- **Reading the newspaper, texting, reading your emails, being on line, etc. will lower your grade significantly.** I may or may not speak to you about it, but I do notice and will grade accordingly.
- Absences will lower your grade since:
 - Some material considered essential to the objectives of the course will only be presented in class
 - The application of key concepts and student co-learning requires participation in class discussions and exercises
 - Predictability, reliability and consistency are core to any strong relationship..."being there" is incredibly important to clients, so it is important in this class
- **If you are unavoidably absent, please let me know either before the class, or in the case of an emergency, as soon as possible following the class.**
- **Only people who attend every class and are attentive and responsive to others and at the least contributing verbally on occasion will receive all 10 points.**

Reading Response Paper - 25 points - Due Tuesday 6/12/12 @11:00 p.m.

Due the day of class by 11:00 p.m. through Ctools. You will find a prompt in Ctools Assignment. You will use the reading material assigned up to and including that week's reading (i.e. through 6/12) and any other earlier material you may want to include to respond.

Grading: will be based on your understanding of key points within the readings, evidence of having done the readings, application of the material to intervention (micro or macro) and your reflective capacity.

Choice Assignment: Paper or Project

CHOICE 1:

65 Points - Individual Paper (5 points for proposal/60 points for paper)

Proposal (due Tuesday 6/5/12) at 11:00 p.m. through Ctools

Write a one to two paragraph description of your topic, and how you plan to approach (i.e. will include a sample case history, or will be primarily research; will include an interview with a person who has struggled with the topic, etc.)

Include three initial citations (APA 6th edition) and a brief annotation of each of the three citations.

Statement of how the paper will link to the overriding context of the impact of stress or trauma on children.

Paper (due Tuesday 7/17/12) at 11:00 p.m. through Ctools

Paper will be 15 - 20 pages - you will choose a theme that applies to children and youth and research it in depth - it could be role of shame in development, defense mechanisms, identity development, etc. This choice gives the student an opportunity to delve deeply into a particular aspect of understanding and treating children and youth.

The major focus of the paper should be a theme vs. a strategy of intervention. Using at least 10 journal citations and no more than 3 to 4 book citations, describe an issue of interest to you that children or youth face. For instance, you may choose to look at the impact of frequent hospitalization on children or, the impact of the same on siblings of the hospitalized children. You could look at a particular set of defense mechanisms, thoroughly describe them, note their evolution in the development of a child and how you would see them and address them therapeutically. Another example might be self-injurious behaviors in adolescence, the roots of such behavior, and how it is addressed, including a sample treatment goal. In all cases, you will be graded on:

* A thorough description of the theme/issue, (i.e. a thorough literature review) - Use APA 6th Edition citation. For a helpful overview of APA, see:
<http://owl.english.purdue.edu/owl/resource/560/01/>

* Your ability to thoroughly convey the symptoms, root causes, impact and treatment approaches (this section should also note how and why the treatment modality would change depending on the age of the child).

* Relation to course theme of trauma/stress - links to brain development, language development, emotional development, etc. For example, chronic hospitalization, abuse or living in poverty, etc., may all effect the brain or another arena of development. Use this section to link your topic to any course concept.

* For the treatment approach you choose, describe a typical goal and strategy.

* Note the role of the family in the treatment.

* Note how societal issues impact the theme you choose (ex. - chronic hospitalization would be experienced differently by a family with economic resources and in close proximity to a hospital than by a family without economic resources or who lived far from a hospital)

* Finally, complete a reflection section - why did you choose this topic? What did you find that encouraged or discouraged you? How did what you find connect with course readings? How might you react to working with a child with the theme/issue in their life? Be thorough and thoughtful about working with this client population.

Basis of Grading:

Level of clinical thinking -

Papers that rate the highest will show strong analytic skills, ability to address multiple viewpoints in a coherent way; evidence strong clinical insight; show strong understanding of human behavior; demonstrate a curiosity about what they hear or see; have a level of empathy for others and know when they are struggling to achieve that;

Integration of materials

Papers that rate the highest will show superior skill in linking reading and lecture materials to their written work; pull from multiple sources; typically go above the requirements but not excessively so; go beyond “person on the street” thinking.

Level of Self-reflection

Papers that rate the highest will show a strong self-awareness or willingness to develop that capacity; they show a willingness to take risks with thinking or note areas where that is difficult; are able to address what is evoked in them response to the work.

Writing skills

Papers that rate the highest will have no typographical or grammatical errors. They will be well written, comprehensive and coherent. They will be within the guidelines, neither excessively short nor excessively long. Citations will be accurate and there will be effective use of quotations. THERE WILL BE NO PLAGIARISM – ALL MATERIAL FROM ANOTHER SOURCE BEYOND THREE TO FOUR WORDS WILL BE ACCURATELY QUOTED AND CITED.

OR

CHOICE 2

65 Points - Group Project -

You will choose an age group/topic to focus upon. **The overriding context is the impact of relational trauma on children** - how does it play out through time, what is the impact on their cognitive styles, their learning, their peer and social interactions, family interactions, involvement in juvenile justice and child welfare, etc. But, your group can choose any particular focus within trauma and/or the age group - for instance, past groups have looked at the effect of poverty on adolescents, or the long term consequences of witnessing domestic violence in the preschool years. Others have focused on bullying as a source of trauma in middle school youth.

Your work will be compiled and individual components will be turned into the instructor on three occasions during the term. See below for a full description of the group assignment and portfolio. I would suggest pacing yourself; there are research, interviewing and writing projects that will take time. I will give you time in class to meet with your group so that most of the

outside work will be individual. However, there may be times when you need to meet, especially as the presentation approaches.

The project will be divided into individual parts which will culminate in the group developing and presenting their findings and recommendations for micro and macro intervention

Each person in the group will **individually** turn in -

A) Literature Review (Due Tuesday 6/5/12) 11:00 p.m. on Ctools

- Assess the needs of this population by reviewing professional journal articles or recently published books on the specifics of this population with emphasis on cultural awareness. For instance, if you are interested in children with disabilities, you could look at literature on the intersection of interpersonal trauma that leads to a disability, adjustment to disability following interpersonal violence, etc.; if you are interested in LGBTQ teens, you could look at the intersection of interpersonal violence (home and community) during the coming out process.
- Each member of the group should read, **and write a four- to five-page (double-spaced) review of three different articles** or resources to be shared with the rest of the group. Only one book may be used - other articles must be from peer-reviewed journals or a respected source - i.e. not newspaper articles or Wikipedia. **Please use APA style 6th Edition for the lit review. If you are unclear on the nature or purpose of a lit review, please look at the beginning of a research article from a peer-reviewed journal for guidance. A good link for APA citation guidance is: <http://owl.english.purdue.edu/owl/resource/560/01/>**
- The reviews should include a brief description of the article, what it states about the needs of the population across social systems, what interventions it promotes and what evidence it includes.
- These reviews will be shared in your small group and should be referred to in your presentation.
- **They should be included in a cohesive bibliography that you will provide to your classmates as a part of the group presentation.**

B) Interviews (Due Tuesday 7/3/12) 11:00 p.m. on Ctools -

Each group member will find a subject to interview that will shed light on the needs, experiences and already existing services to this population. Your interview will explore:

- The common and diverse needs of individuals within this population and the risk and protective factors affecting this population across intervention systems.
- The patterns, syndromes and tensions inherent in the ecological systems that effect this special population.
- The impact of culture and diversity in regard to race, ethnicity, national origin, class, gender/gender identity, religion/spirituality, sexual orientation, ability/disability, environment, age, etc. (ex., what is the range of how family violence is addressed in the specific culture of the person you are interviewing, or in the population they serve - in some instances you may have to infer this).

More specifically (if only 3 in a group, you may choose three of the four):

One person in the group will interview a child or youth member of the focus population (for a young child you will need to find a parent (birth, adoptive or foster) who can speak to what the child says through their behavior and needs):

Some questions may include, but not be limited to:

What is it like for you to live with. . . . ?

How do you manage on a daily basis. . . ?

Who helps you with this?

What has been helpful and not helpful?

What are your hopes and dreams in relation to the issue?

One member will focus on a parent of a child or youth of the focus population.

Some questions may include, but not be limited to:

What is it like for you to have a child who. . . . ?

How do you manage on a daily basis ?

If you get help with this, from whom?

What has been helpful and not helpful?

What are your hopes and dreams in relation to the issue?

One group member will interview a helping professional who works with the focus group.

Some questions may include, but not be limited to:

What are your personal goals in working with this population?

What are the goals of the agency you represent in working with this population?

What are your feelings about working with this population?

What are the challenges, frustrations, joys and rewards of working with this population?

What has been successful and unsuccessful for you in working with this population?

One group member will interview an agency administrator whose agency serves the target population (could be a school administrator).

Some questions may include, but not be limited to:

What are your agency's goals in working with this population?

Who funds your work with this population?

What are the policy issues that affect you work with this population?

How have policy or advocacy issues affected you work with this population?

Each student will write up the major themes and learning from her/his **interview in a three to four-page (double-spaced) paper**. *Relate the content and learning from your interview to at least two readings from the course and reference these readings*. Also, include connections from class lectures where relevant.

Also include a personal reflection at the end of your write-up reflecting on the following questions:

- Did anything surprise you?
- What did you learn that is new?
- What did you take away from this experience?
- What was it like to hear how trauma and stress affect children?
- What empathetic understanding did you gain from this experience?

What you learned from your interviews will be shared in your small groups and should be referred to in your class presentations.

As a group you will develop:

C) Group Presentation (Due 7/10 and 7/17/12)

Include all the major aspects of the project in your presentation from your needs assessment (literature review and interviews) to develop and present some form of intervention, including plans for funding and evaluation, to your actions for advocacy and change. Include a discussion of the cultural competence of the model in relation to common disparities plaguing programs and systems related to children.

Please create power points, handouts and/or visual aids or skits that will be helpful in presenting your intervention; do not let powerpoint restrict you from creativity and spontaneity in your presentation. **Some groups have found it helpful to imagine their audience is a group of teachers, funders, etc.** Explain your intervention in detail and how it is rooted in evidence. You will have approximately 45 minutes with 15 minutes for fielding questions. Group presentations will be scheduled for the last class period (unless there are 4 groups). **They should be in some way lively and engaging - if you are not a good public speaker, let someone else do the speaking.** However, all group members must participate in the presentation in some way and it must be cohesively presented. **Create and distribute a joint bibliography of your sources including the readings from your lit reviews.**

D) Conclusion and Reflection (Due 7/24/12) - 11:00 p.m. on Ctools

Each person will write and individually turn in a two to three page (double-spaced) **reflection of your group experience, the dynamics of your group and your role in your group.** If there was conflict in your group, discuss how you addressed it, or give reasons why you did not, what you learned about yourself in groups and how you might apply that to future practice. Your final paragraphs should reflect what you learned about childhood trauma and treatment; how systems perpetuate or interrupt the cycle and how you hope to address even one small part of the issue in your practice.

Grading and Dates Due for Group Project:

Lit review -	20 points	Due 6/5
Interview -	25 points	Due 7/3
Presentation -	15 points	Due 7/10 and 7/17
Final Reflection -	5 points	Due 7/24

Basis of Grading:

Level of clinical thinking or systemic thinking -

Papers and presentations that rate the highest will show strong analytic skills, ability to address multiple viewpoints in a coherent way; evidence strong clinical insight or insight into how systems operate; show strong understanding of human behavior; demonstrate a curiosity about what they hear or see; have a level of empathy for others and know when they are struggling to achieve

that; demonstrate an ability to think about what they heard, *as well as* what they did not hear.

Integration of materials

Papers and presentations that rate the highest will show superior skill in linking reading and lecture materials to their written work; pull from multiple sources; typically go above the requirements but not excessively so; go beyond “person on the street” thinking.

Level of Self-reflection

Papers that rate the highest will show a strong self-awareness or willingness to develop that capacity; they show a willingness to take risks with thinking or note areas where that is difficult; are able to address what is evoked in them response to the work.

Presentation

Presentations that are lively, creative, thorough, insightful, well-prepared, make good use of the components and stay within the time allowed will be those that receive the highest points.

Writing skills

Papers that rate the highest will have no typographical or grammatical errors. They will be well written, comprehensive and coherent. They will be within the guidelines, neither excessively short nor excessively long. Citations will be accurate and there will be effective use of quotations.

Final Grades

A+	100	B+	87-89	C+	77-79
A	95-99	B	83 -86	C	73-76
A-	90-94	B-	80-82	C-	70-73

SW696
Weekly Schedule
Sp/Su 2012

NOTE: ALL Ctools Readings found in Resources section of Ctools site
INITIAL AGENDA

5/8 Course Introductions
Course Expectations
Terminology – terms we will use throughout the course
Group Formation

Reading:

- van der Kolk, B. and Pynoos, R.S. (2009). Proposal to include a developmental trauma disorder diagnosis for children and adolescents in DSM-V

5/15 Groups meet - 8:30 - 10:00 Class begins at 10:00
Assessment and Treatment Planning through an Attachment Lens
Micro and Macro implications

- Twemlow, S.W., Fonagy, P., Sacco, F.C. (2005). A developmental approach to mentalizing communities: A model for social change. *Bulletin of the Menninger Clinic*. 69 (4):265-281.
- Shapiro, V. (2009). - Reflections on the work of Professor Selma Fraiberg: A pioneer in the field of Social Work and Infant Mental Health. *Clinical Social Work Journal*. 37: 45-55. (Please read - addresses multiple dimensions of the course - assessment and treatment planning, working with parents, defense mechanisms, working with children with disabilities and working with older children).
- Gauthier, Y. (2003). IMH in the Third Millenium: Can We Prevent Aggression? *Infant Mental Health Journal*, Vol. 24(3), 296–308.
- Schiraldi, G. (2009). The Post-Traumatic Stress Disorder Sourcebook. Intro - Chapter 3 (pp. xi-37)

5/22 SW in Child Welfare
Trauma and the Brain (8:10 - 10:00)

Readings:

- Teicher, M. *Scars that Won't Heal: The Neurobiology of Abuse*
- Mann, J (2006). *A Disorganized Toddler in Foster Care: Healing and Change from an Attachment Theory Perspective.*
- Perry Text
 - Introduction
 - Chapter 9 – Mom is Lying. Mom is Hurting Me. Please Call the Police.

Optional:

- Dependent Youth Aging Out of Foster Care: A Guide for Judges

5/29

PTSD

Readings:

- Schiraldi - Chap. 5 and 6 (pp. 51 - 70)
- Perry –
 - Chap. 1 – Tina's World
 - Chapter 2- For Your Own Good. (WARNING - A very disturbing chapter - be prepared).
 - Chap. 6 - The Boy Who was Raised as a Dog

6/5

Lit Reviews or Individual Paper Proposals Due (6/4@ 11:00 p.m. - Ctools)

Psychology of Poverty

Skilled Dialogue

Readings:

- Schiraldi - Chap. 9 - 11 (pp. 91 - 108)
- Knitzer, J. and Perry, D.F. (2000) Poverty and Infant and Toddler Development: Facing Complex Challenges. In Zeanah, C. (Ed). *Handbook of infant mental health, 3rd ed.*
- Abelev, M. (2009). Advancing out of poverty: Social class worldview and its relation to resilience. *Journal of Adolescent Research* 24: 114
- Barrera, I. and Kramer, L. (2007). Skilled dialogue: weaving webs of connectedness across diverse voices and identities. *Childhood Education* 83 (5). 304-308.

Optional

- The Children Left Behind - Innocenti Report 2009

6/12

Reading Response Due Tuesday, 6/12/12 @ 11:00 p.m. through Ctools

SW In Educational Settings

Learning Disabilities

Sensory Processing Disorders

Readings:

- Perry – Chapter 10 – The Kindness of Children
- Woodhead, M. and Oates, J. (2007). Attachment Relationships. *Early childhood in focus: Quality of Care for Young Children*. Viii-46.
- Children in Poverty - Promoting Effective Early Learning
- Bronx Booklet: The Schools We Need
(<http://www.whatkidscando.org/publications/pdfs/bronxbooklet.PDF>)

OPTIONAL:

- Twemlow, S.W., Fonagy, P. Sacco, F.C., Brethour, Jr., J.R. (2006) Teachers who bully students: A hidden trauma. *Journal of Social Psychiatry* 52: 187-198.

6/19

SW in Mental Health Settings
Types of Treatment - Overview
Child Play Therapy
Theraplay

Readings:

- Pawl, J. (1984). Strategies of Intervention. *Child Abuse and Neglect*. 8: 261-270.
- Stolbach, B.D. (2005) Psychotherapy of a Dissociative 8 year old boy burned at age 3. *Psychiatric Annals* 35: 685-694.
- Schiraldi - Chap. 17 & 18 (pp. 159 - 184)

OPTIONAL:

- Siegal, D. (2006). An interpersonal neurobiology approach to psychotherapy. *Psychiatric Annals* 36: 248-256.

6/26

Grief and Loss
Working with Parents and Professionals

Readings:

- Schiraldi, Chap. 19 and Chap. 28-29
- Cunningham - Using Attachment Theory in Residential Treatment
- Bowlby - The place of separation and loss in psychopathology

7/3

Interview Paper Due on 7/3 @ 11:00 p.m. through Ctools
Guest Speaker: Carryn Christianson
Intervention
CBT
DBT

Readings:

- Perry - The Raven
- McKay, M., Wood, J., & Brantley, J. (2007) Basic Distress Tolerance Skills. In *The Dialectical Behavior Therapy Skills Workbook*

7/10

Involuntary Youth - Residential Treatment, Juvenile Justice,

Readings:

- Perry - Chapter 5 - The Coldest Heart
- Perry – Chap. 11 – Healing Communities
- Delaney Kathleen R (2006). Following the Affect: Learning to Observe Emotional Regulation. *Journal of Child and Adolescent Psychiatric Nursing*. 19(4): 175-181

OPTIONAL:
