Instructor: Antonio G Alvarez
Thursday 6:00-9:00 PM; SSWB Room B760
Office: Rm. 2760
Office hours- By appointment (Tuesdays or Thursdays)
aalvarez@umich.edu

Course Description
This course will focus on experiential and adventure practice (theories, models, tools and techniques) that social workers may use in their work with individuals, groups, families, organizations and communities. Some particular focus will be given to their use in social work with groups. Students will be introduced to adventure through readings, discussions, guest speakers and experiences. This course is designed to provide the student with a theoretical, philosophical and experiential understanding of adventure and experiential learning and its application to Social Work Practice. Theoretical models of practice arising out of the adventure and experiential fields will be offered and discussed in tandem with current social work theories and models of practice. Evidence-based literature will be reviewed to promote experiential interventions that build on strengths and resources of individuals and their families, and that integrate components of evidence based practice into the experiential methodologies.

Course Content
Course content will include:
- Theoretical and philosophical foundations of adventure based practice
- Discourse on the safe and appropriate use of adventure activities with different client groups
- Integration of evidence-based practice techniques in the application of adventure based practice
- Use of adventure activities in assessment and intervention
- The creation and maintenance of physical and emotional environment conducive to change and growth
• Impact of assessment data and environmental conditions on client outcomes
• The art of matching intervention tools with individual and environmental assessment
• Demonstration of a variety of facilitation skills using adventure activities
• Exploration of effective methods of processing experience and enhancing the learning from interventions
• Appropriate use of program evaluation to maintain personal and program efficiency

In this course the emphasis of intervention is as much on the context as on the individual. Intervention strategies focus on ways to bring about change at levels such as the classroom or school, the peer group, and the community or population, as well as at the individual level. Mezzo and macro practice skills covered in this course are aimed at promoting interpersonal competence, self-esteem, self-efficacy, achievement, and moral development by making the contexts within which they develop more responsive to their expressed needs.

Direct practice methods covered in this course provide students with the skills necessary to select and provide effective short-term interventions, evaluate direct practice, develop service delivery systems and work effectively with individuals, families and groups in society. Skills for engagement, assessment, intervention, prevention, and evaluation relevant to contexts such as families, neighborhood and community, schools, group care facilities, residential care, hospitals, correctional programs and institutions, courts, governmental and nongovernmental agencies will be covered.

Intervention strategies will be derived from the experiential and adventure approaches and theoretical perspectives. Students will learn to use the knowledge and skills to engage and communicate effectively with all consumers. The student will learn how to design individual programs of intervention that are based on clearly articulated goals and priorities, reflect an examination of the evidence base and are consistent with social work ethics and values. Throughout the course, cultural competence and sensitivity to differences among families and the impact of worker/client differences in values, experiences, and power will be analyzed. In addition, the student will learn to understand the significance of "multiple identities" (the interaction of factors such as the diverse dimensions: including ability, age, class, color, culture, ethnicity, family structure, gender (including gender identity and gender expression), marital status, national origin, race, religion or spirituality, sex, and sexual orientation) in shaping the uniqueness of families and individuals and in shaping power and privilege differences.
Course Objectives
Upon completion of the course, the students will be able to:

- Describe the theoretical underpinnings of Experiential and Adventure Practice
- Apply relevant Social Work practice principles into Adventure Practice
- Demonstrate a model for adventure/experiential facilitation.
- Demonstrate knowledge of the tools and techniques of adventure practice
- Perform adventure-based assessments, formulate adventure-based plans and develop evaluation procedures.
- Understand the significance of environmental/ecological factors in individual assessment and interventions, as well as broader contexts of family, group, neighborhood, and society.
- Safely facilitate client systems through some of the common tools in adventure practice, including those that are found in Challenge Courses
- Demonstrate ways to help the participant(s) transfer the learning from the facilitated experience to other aspects of their life.
- Adapt adventure tools for use indoors, particularly for the counseling or therapeutic setting.
- Demonstrate appropriate use of adventure-based activities with diverse client groups and in different settings.
- Discuss typical ethical concerns related to adventure-based Social Work practice.

Course Design:
THS CLASS IS ABOUT LEARNING EXPERIENTIAL/ADVENTURE TOOLS. IT WILL BE EXPERIENTIALLY TAUGHT! EXPECT TO ENGAGE REGULARLY IN PHYSICAL AND INTERACTIVE ACTIVITIES. Other classroom teaching strategies may also be used, including lecture, multimedia presentations, small and large group discussion, presentations by students and guest lecturers. Students’ experiences in the field will be utilized as much as possible in assignments and case presentations and discussions.

Relationship of Course to Four Curricular Themes:
- *Multiculturalism and Diversity* will be addressed through careful analysis of how these models can be applied and modified to fit the special needs of various groups. Resistance and motivation of participants to interventions will be covered to demonstrate how effective intervention models must be adapted to fit the needs of various ethnic and racial groups. This course will emphasis that mono-cultural models must be adapted to fit the definitions of “problem” and “treatment” that exist in diverse groups in order for social workers to practice with assorted client systems from diverse backgrounds.
• Students will learn to recognize the existence of group differences in a number of areas (such as nonverbal communication, individual and family values, family and community structures, preferred and accepted responses to crisis, response to exclusion or oppression) and how these may impact intervention relationships with individuals and their families.

• Social change and social justice issues will be addressed by recognizing that historically poor and oppressed clients have been excluded from adventure and experiential programs. This course will also examine how socioeconomic exclusion arises in screening criteria that exclude clients because of intelligence, verbal ability, insight, and motivation. Advocacy for individuals, especially children and youth whose families and communities are particularly impacted by social inequality and social injustice, will be emphasized at individual, family, organizational, community, and policy levels.

• Promotion and prevention will be addressed through a focus on intervention models and procedures that can be used to prevent and treat psychosocial problems of all individuals including children, youth and adults. These areas are addressed in the micro practice areas through family life education, family preservation activities, early identification of children/youth at risk, and family. At the mezzo and macro practice levels, program development and evaluation, and staff and professional training (teambuilding, communication workshops, etc), addresses the relationship between program decisions and risks to individuals and families.

• Social science knowledge is presented as the necessary basis for conducting empirically grounded assessment, intervention and evaluation practice at all levels of intervention. Course materials draw upon research knowledge from a variety of social sciences, as well as other professions and disciplines (i.e., social work, education, psychology, sociology, etc.), and emphasize the need for multidisciplinary collaboration and communication around issues related to individuals, especially children and youth, and their ecosystems. Social science research concepts and methods are described in relationship to both social work practice and program and policy evaluation processes.

Relationship of the Course to Social Work Ethics and Values
When working with adults, social workers must encourage self-determination while empowering them to choose and pursue their own goals. Ethical issues around management of boundaries, addressing physical space, touching, as well as encouraging clients to make choices and live by their consequences will be discussed as they impact individual clients. Practice with children and youth require considerable attention to issues of ethics and values, due to the special challenges these populations offer the social work practitioner. For example, issues of self-determination and autonomy often arise when an adolescent discloses important information that has not been shared with a parent or other responsible adult. Social work values and social science knowledge may also conflict with the child-rearing beliefs and practices of some cultural or religious groups. Social work values and ethics, as outlined in the professional Code of Ethics, are
presented as the necessary and appropriate guidelines for practice when ethical dilemmas arise in social work practice.

**Accommodations for Students with Disabilities**
Let me know if you need an accommodation for a disability. All aspects of the course can be modified to facilitate your learning process. There are resources available to help us to meet your needs. Know that when you disclose a disability to me, I will treat that information as private and confidential.

**Course Resources**
1. **Required Texts:**
2. **Recommended Texts:** (If you intend to do individual family or group counseling or therapy)
3. **CTools Site:** Will provide access to many/most of our additional readings during the course. Several websites which contain useful resources for our use will be provided.
4. **UM and Alvarez Libraries:** A few texts and journals are available at the library and in the instructor’s personal library and can be borrowed for short periods of time.

**Course Expectations**
- Professional Accountability (see clarifications below)
- Out of class reading and preparation
- Completion on an individual project at the student’s field placement setting (or an alternative if the placement is unable to offer the experience)
- Completion of other assignments (more during class session)

*Professional accountability* will be based on the following criteria. The professional accountability points are assigned based on the collection of all of these factors NOT just attendance.
• **Engagement:** The appropriate, respectful, and relevant participation in one's own learning as well as contributions to the learning of others. Inappropriate engagement can negatively affect your grade (disrespectful comments, side conversations, and inappropriate comments, text messaging, etc.).

• **Integration:** The demonstration of appropriate efforts to make connections, both conceptual and practical, between the course curriculum and your experience. Inappropriate efforts (clear lack of having done reading, raising questions that are not related to the conversation or discussion) can negatively impact this portion of your grade.

• **Attendance:** Attendance is required and is considered as being present for the entire class period. Point will be subtracted for each session missed. Participation in class discussions is contingent upon attendance and can be used to affect your grade. Although some absences are justifiable, that does not suggest that points will not be lost.

• **Timeliness:** Completion of assignments on date due, including coming to class prepared to discuss and apply assigned readings.
