

<b>Course title:</b>	SW 602 Interpersonal Practice Interventions in Integrated Health, Mental Health and Substance Use	
<b>Course #/term:</b>	SW 602, Section 002, Winter, 2021	
<b>Time and place:</b>	Wednesday, 9:00a-12p, Virtual Class Room	
<b>Credit hours:</b>	3	
<b>Prerequisites:</b>	SW 511 and 521	
<b>Instructor:</b>	Mari Pitcher	
<b>Pronouns:</b>	She, her, hers	
<b>Contact info:</b>	<b>Email:</b> pitcherm@med.umich.edu	<b>Phone:</b> 919-949-4376
	You may expect a response within 24 hours	
<b>Office:</b>	Virtual meeting space	
<b>Office hours:</b>	Mon-Wed 5p-8p by phone, or via Zoom by appointment	

## 1. COURSE STATEMENT

---

### a. Course Description

The course will build on intervention therapy and practice from the foundation semester and promote more advanced intervention skill level of engagement, contracting, use of evidence based, evidence informed interventions and termination/evaluation phases. Particular focus will be on advanced clinical competency development regarding: 1. Behavioral activation, 2. Cognitive restructuring, 3. Managing resistance, 4. Emotion Regulation, 5. Functional Analysis, 6. Problem solving Interventions, and 7. Chronic Distress Tolerance.

This course focuses on skill building to provide a range of brief, evidence-based and/or evidence-informed interventions including prevention, treatment and recovery as well as longer-term treatment and support for clients as appropriate. Examples include: motivational interventions; brief treatments for mental health and substance use problems; adjustment to illness, crisis intervention, and chronic illness management. Core evidence-based/evidence-informed therapies will be the focus of this class including: 1) motivational interviewing, 2) cognitive behavioral therapy (CBT), and 3) emerging acceptance based behavior therapies (e.g. acceptance and commitment therapy (ACT), dialectical behavioral therapy (DBT), etc.).

This course is adult-focused. Attention will be given to application of interventions with clients across diverse populations and need, with a focus on common health and mental health conditions such as depression/anxiety, substance use, chronic pain, etc. Attention will also be given to application of interventions in a variety of practice settings such as community mental health agencies, health care facilities and non-profit agencies.

## **b. Course Objectives & Competencies**

Upon completion of the course, students will be able to:

1. Identify and provide evidence-based interventions and best social work practices in a variety of health settings including integrated health, mental health, behavioral health, hospital, outpatient and community care settings. (EPAS Competency 2, 4, 8)
2. Deliver brief, trauma-informed, interventions for mental conditions, risky or harmful substance use conditions, adjustment to illness and chronic disease management. (EPAS Competency 2, 4, 8)
3. Provide clinical, evidence-based/evidence-informed rationale for use of a specific intervention to match client needs, preferences and response. (EPAS Competency 2, 4, 8)
4. Use focused interventions to engage clients in change process to improve health and to adhere to patient-centered treatment/care plans (e.g., motivational interviewing) (EPAS Competency 4, 6, 8)
5. Deliver brief supportive interventions addressing holistic consequences of physical, mental illness and injury. (EPAS Competency 6, 8)
6. Identify and provide longer-term models of treatment and support for clients with persistent illnesses/conditions that require follow-up over time. (EPAS Competency 6, 8)
7. Provide information, education, guidance, and support to family members about health conditions, prevention, available treatments, illness and self-management, peer support and recovery. (EPAS Competency 2, 6, 8)
8. Monitor and evaluate outcomes of interventions and modify, adjust interventions accordingly. (EPAS Competency 7, 9)

## **c. Course Design**

This course supports a flipped classroom approach in which students complete pre-work (readings, viewing videos) and class time has minimal didactic lecture and is primarily spent practicing intervention techniques.

Use of student generated standardized patients developed in the required assessment course may be used to practice intervention skills.

Active engagement in intervention practice, engaging in role plays, observation and critical analysis of various interventions, matching interventions to client needs, and mutual constructive feedback is critical to the skill development focus of this class.

## **d. Intensive focus on PODS**

This course integrates PODS content and skills with a special emphasis on the identification of theories, practice and/or policies that promote social justice, illuminate injustices and are consistent with scientific and professional knowledge. Through the use of a variety of instructional methods, this course will support students developing a vision of social justice, learn to recognize and reduce mechanisms that support oppression and injustice, work toward

social justice processes, apply intersectionality and intercultural frameworks and strengthen critical consciousness, self-knowledge and self-awareness to facilitate PODS learning.

Consideration will be given to the ways in which diversity factors such as age, race, ethnicity, disadvantaged, oppression, gender, sexual orientation, sexual identity, class, immigration status, ability, family status, geographic location, ethnicity and culture interact with and impact health, mental health and behaviorally focused interventions.

## 2. COURSE REQUIREMENTS

### a. Text and Class Materials

To fully engage in the course and become a competent and skilled social work practitioner, it is expected that students will complete all required readings prior to class on Wednesday. Readings will be embedded into course lectures, discussions, and assignments.

Book Club & Group Presentation	April 21, 21	15 / 15%
<b>Total Possible Points</b>		<b>100</b>

**Attendance & Participation (20 points/20%)**

As an advanced practice course, it is important that you attend each class session. The class sessions involve skill development experiences that go beyond course readings/learning tasks. Missing class sessions will lower your grade since your participation as a co-learner is essential to meet the learning goals for this requirement.

Regular class attendance is a requirement of this course. Your grade will be negatively impacted if more than one class is missed without direct communication with your instructor. Please communicate any classes that you may miss to your instructor via e-mail ([pitcherm@med.umich.edu](mailto:pitcherm@med.umich.edu)) or phone/text (919-949-4376). The student and instructor will agree upon make-up assignments when more than one class is missed. *Any failure to communicate an absence to this Professor will result in a full point deduction for that class. Please refer to the [Policy on Class Attendance](#) found in the MSW Student Guide for additional information.*

Each class encourages dialogue regarding the readings, lectures, and in-class skills demonstrations. Participation in this course will occur in small and large group discussions. It is

essential to abide by the NASW Code of Ethics and maintain the highest level of respect for another as colleagues/peers, as well as for the clients/communities that we will be discussing in class. Please avoid the use of electronics during the course. If you need to take a phone call or respond to a text message or email, then please step out of the class and return when you are done. It is expected that your computer only be used to take notes during lectures.

Levels of participation may vary based on comfort and interest in topics discussed. I will do my best to honor each student's participation level in the course. Please communicate any difficulty that you are experiencing related to course materials and discussions and I will do my best to help resolve the matter or identify appropriate support services if requested.

### ***A Note on the Learning Environment:***

The class is designed as a co-learning environment and one where class members are encouraged to try new skills and take risks. Your contribution as a "teacher and a learner" in the class will enhance the learning for all class members.

Quality social workers must be self-aware, self-reflective, and open to exploring our own histories and issues regarding any given concern or population. Be prepared to reflect on and explore your own family history, social systems, experiences, identity, cultural background and assumptions regarding forms of diversity. There will be a variety of ways that students can do this through critical thinking, assignments and active participation in class discussions and activities.

Being honest, sensitive, and respectful to each other in preparation for quality social work practice is one of the learning environment goals. Please share opinions and feedback with others in discussions and exercises, and when you do so, please try to state them in a respectful and constructive manner.

Also, prepare yourself to hear varying opinions and feedback non-defensively, and to use those data or challenge them constructively. Please practice tolerance, not expecting yourself or your classmates to be polished in discussions about issues that can be challenging and confusing. We can expect to blunder and make mistakes in the classroom so that we are better prepared when we are in the field; please honor this process.

A student is expected to be on time, prepared with questions from readings, DVDs and assignments, respectful of diverse perspectives, open to learning and to complete assignments on time.

**All assignments are expected to be handed in on their due date prior to the end of the day (11:59pm).**

**Late assignments will be marked down 1 point for every day they are late.**

### **Ethical Issues Paper (5 points/5%)**

This assignment is aimed at exploring your ability to think critically about ethical social work practice. Describe a current or past ethical dilemma you faced with an adult client. If you have

not had experience working with adult clients, then please identify a dilemma that you anticipate may occur in the future or one that you've heard of from a colleague or peer. Discuss possible ways for resolving the dilemma or the way you did resolve it. Make sure to specifically reference what ethical violation(s) exists in the identified dilemma. This brief paper should be 1 – 2 pages in length and in APA format. You will be graded on the following:

- Clearly describe the ethical dilemma. Students are required to identify ways for resolving the dilemma or thoroughly explain the way in which it was resolved. (2 points)
- Well thought-out, critical analysis of the dilemma and understanding of the NASW ethical principle(s) explored. (2 points)
- State the NASW value and/or ethical principle that you are referring to. (.5 points)
- On-time submission. (.5 points)

### **Role Plays, Reflections, and Peer Evaluations (45 points/45% each simulation & reflection worth 15 points)**

This is a partnered assignment block. You will work with a classmate (or 2) to practice full-length (50-minute) therapy sessions using vignette-based clients. A total of three sessions will be recorded with a partner and submitted to the instructor for a grade via Canvas. When acting as the clinical social worker, you will be responsible for completing and submitting a SOAP note based on the role-play. As a mock “client,” you will fill out a Session Rating Scale for each role-play and provide it to your classmate as a way to provide peer feedback/evaluations. You will also submit a reflection (written or video taped) to explore your experience with demonstrating the intervention skills, your understanding of the modality, and any outstanding questions that you have about the intervention you demonstrated (reflections are only required for MI and CBT simulations). Your video, SOAP note and reflection paper/video should be submitted on CANVAS. Any late submissions will result in a 1 point deduction per day.

### **Clinical Case Consultation & Written Reflection (15 points/15%)**

Each student will present a case to a consultation team (approx. 2-3 students) during class on March 31 and submit a written summary/reflection the following week, Assignment instructions can be found on CANVAS.

### **Book Review (15 points/15%) ---- time in every 3rd class**

On the first day of class, you will rank your interest in reading one of four potential books that will be assigned for a book club assignment and presentation. You will gather in your book club 4 times over the course of the term to discuss the book and document your key learnings. Your book club will develop and present a brief powerpoint summary of key learnings and implications for practice (held via Zoom) on April 21, 2021. This assignment invites you to engage in clinically relevant content and gives you the opportunity to critically explore its relevance to your life experience and/or practice. Assignment instructions can be found on CANVAS.

*Book Choices:*

- ***The Inner Work of Racial Justice: Healing Ourselves and Transforming our Communities Through Mindfulness*, by Rhonda V. Magee, Foreword by Jon Kabat-**

Zinn. Illuminates the very heart of social justice and how it might be approached and nurtured through mindfulness practices in community and through the discernment and new degrees of freedom these practices entrain.” **Originally published:** September 17, 2019

- ***Post Traumatic Slave Syndrome: America's Legacy of Enduring Injury and Healing is a 2005 theoretical work*** by Dr. Joy DeGruy. P.T.S.S describes the multi-generational trauma experienced by African Americans that leads to undiagnosed and untreated posttraumatic stress disorder in enslaved Africans and their descendants. **Originally published:** 2005
- ***White Fragility: Why It's So Hard for White People to Talk About Racism***, by Robin DiAngelo is a 2018 book about race relations in the United States. **Originally published:** June 26, 2018
- ***My Grandmother's Hands: Racialized trauma and the pathway to mending our hearts and bodies*** by Resmaa Menakem. The consequences of racism can be found in our bodies - in skin and sinew, in bone and blood. Therapist, Resmaa Menakem examines the damage, the physical consequences of discrimination, from the perspective of body-centred psychology. He argues that until we learn to heal and overcome the generational anguish of white supremacy, we will all continue to bear its scars. Originally published

#### d. Grading

A+ = 100%	B+ = 89 – 91%	C+ = 78 – 80%
A = 96 – 99%	B = 85 – 88%	C = 74 – 77%
A- = 92 – 95%	B- = 81 – 84%	C- = 70 – 73%

**Please note:** A grade in the A range is based on demonstration of skills beyond expected competency and at an exemplary, outstanding, or excellent degree. A grade of B indicates mastery of the subject content at a level of expected competency for graduate study. A B grade indicates the work has met the expectations of an assignment for graduate student performance. A C grade range indicates minimal understanding of subject content and significant areas need improvement.

For all assignments, you will be graded on:

- Meeting assignment parameters (we will review parameters for each assignment ahead of time);
- Quality of writing skills: clarity of thought, organization, and flow (also see below);
- Effort/ability to self-reflect and think critically;
- Demonstration of social work values (PODS, empathy, strengths-based thinking, etc);
- Insightfulness and clinical acuity;

- Integration of reading materials, as requested; and
- Ability to discern which aspects of use of self would be important in assessment or intervention

### **References and Referencing Style**

When using others' work, it is mandatory to cite the original source. Social work publications generally follow the referencing format specified by the American Psychological Association (APA); therefore you are expected to follow this referencing style. Publication Manual of the American Psychological Association (7th Edition) is accessible via internet.

You may also refer to: [Grades in Academic Courses and in Field Instruction](#) as well as [Student Grievance procedures](#) and the [policy for grading in special circumstances](#).

### **Incompletes**

Incompletes are given only when it can be demonstrated that it would be unfair to hold the student the stated time limits of the course. The Student Guide, Vol. 1, Sec. 8.01 states that and I grade is used when illness or other compelling reasons prevent completion of work, and there is a definite plan and date for completion of course work approved by the instructor. The student must formally request an incomplete from the instructor prior to the final week of classes.

### **Class Recording and Course Materials**

Audio and video recording of in-class lectures and discussions is prohibited without the advance written permission of the instructor. Students with an approved accommodation from the Office of Services for Students with Disabilities permitting the recording of class meetings must present documentation to the instructor in advance of any recording being done. The instructor reserves the right to disallow recording for a portion of any class time where privacy is a special concern. If the instructor chooses to record a class, they will decide which classes, if any, are recorded, what portion of each class is recorded, and whether a recording is made available on the course management website. On days when classes are recorded, students will be notified a recording is occurring. Class recordings and course materials may not be reproduced, sold, published or distributed to others, in whole or in part, without the written consent of the instructor. [Recording and Privacy Concerns FAQ](#)

### **COVID-19 Statement**

*For the safety of all students, faculty, and staff on campus, it is important for each of us to be mindful of safety measures that have been put in place for our protection. By returning to campus, you have acknowledged your responsibility for protecting the collective health of our community. Your participation in this course on an in-person/hybrid basis is conditional upon your adherence to all safety measures mandated by the State of Michigan and the University, including maintaining physical distancing of six feet from others, and properly wearing a face covering in class. Other applicable safety measures may be described in the [Wolverine Culture of Care](#) and the [University's Face Covering Policy for COVID-19](#). Your ability to participate in this course in-person/hybrid may be impacted by failure to comply with campus safety measures. Individuals seeking to request an accommodation related to the face covering requirement under the Americans with Disabilities Act should contact [the Office for Institutional Equity](#). If you are*

*unable or unwilling to adhere to these safety measures while in a face-to-face class setting, you will be required to participate on a remote basis.*

Students who fail to comply with remote-only participation will be de-enrolled from the class and will be reported as violating the Student Rights and Responsibilities COVID Addendum language which states:

1. Members of the Student community are expected to comply with health and safety laws, orders, ordinances, regulations or health and safety guidance adopted by the University as it relates to public health crises, including COVID-19, where failure to do so may result in public health risk. This guidance will evolve as the public health crisis evolves and may include, but is not limited to, social distancing, mandatory COVID-19 testing, de-densifying efforts, limitations on mass gatherings, wearing a face covering, contact tracing, and quarantine / isolation requirements.
2. Failure to comply with the public health guidance adopted by the U-M as it relates to face coverings, which is subject to change and which is currently located at:  
<http://ehs.umich.edu/wpcontent/uploads/2020/07/U-M-Face-Covering-Policy-for-COVID-19.pdf>
3. Failure to participate in and maintain isolation and/or quarantine, as instructed by a health care provider or public health officials, which may include U-M Environmental health and safety. Students seeking to request an accommodation related to the face covering requirement under the Americans with Disabilities Act should contact the Office for Institutional Equity.
4. Hosting or attending a social gathering larger than the allowable limits set by any state or local law or University policy. This provision does not preclude constitutionally protected activity, such as protesting, or individuals who may be residing together in a single household.

### **Health-Related Class Absences**

Please evaluate your own health status regularly and refrain from attending class and coming to campus if you are ill. You are encouraged to seek appropriate medical attention for treatment. School of Social Work students who miss class due to illness of any kind will be given opportunities to access course materials online or provided with alternative learning opportunities. Please notify me by email about your absence as soon as practical, so that I can make accommodations. Please note that documentation (a Doctor's note) for medical excuses is not required.

### **3. ADDITIONAL COURSE INFORMATION AND RESOURCES**

---

**Additional School and University policies, information and resources are available here: <https://ssw.umich.edu/standard-policies-information-resources>**

#### **They include:**

- Safety and emergency preparedness

- Mental health and well-being
- Teaching evaluations
- Proper use of names and pronouns
- Accommodations for students with disabilities
- Religious/spiritual observances
- Military deployment
- Writing skills and expectations
- Academic integrity and plagiarism
