1. Course Statement

a. Course description
This course will survey the distribution, determinants, and biomedical, psychological and behavioral aspects of health inclusive of physical, mental and behavioral health and disease across the life span from pre-birth to death. Social, economic, environmental, structural and cultural variations in and determinants of health, disease, and quality of life will be addressed, including the influence of factors such as race, gender, sexual orientation, geography, ability, biological, genetic and epigenetic factors. Barriers to access and utilization, geopolitical influences, environmental justice, social injustice, oppression and racism, historical trends, and future directions will be reviewed. Health beliefs and models of health behavior (e.g. Health Belief Model, Theory of Planned Behavior,) and structural determinants of health (e.g. Minority Stress Theory) will be presented, including help-seeking and utilization of health services. Stress, allostatic
load, coping and social support, adaptation to chronic illness, the influences of privilege, stigma and discrimination, quality of life, and death and dying will also be covered.

b. Course content
This course will provide students with an overview of major causes of mortality and morbidity in the United States, including demographic, biological, behavioral, social, community, and epigenetic factors affecting health, disease, and quality of life. Special emphasis will be placed on risk factors and protective factors and implications for health promotion and disease prevention over the life span. A major focus of this course will be the impact of race, ethnicity, culture, gender, and sexual orientation on health and disease, as well as the effects of poverty, discrimination, and privilege on access, utilization, and quality of care. Comparative definitions and theories of health and disease, including their evolution, strengths, limitations, and implications for social work and social welfare, will be presented. Theories and research on health behavior will be examined, including cultural differences in health beliefs and practices, use of health services, and barriers to care. Research and theory on stress, coping, and adaptation to illness over the life span will be presented, including the role of social support and the impact of discrimination and privilege on health status and disease outcomes. Implications for social work practice and social policy will be addressed throughout this course.

c. Course objectives and competencies
Upon completion of the course, students will be able to:
1. Describe the major causes of mortality and morbidity in the United States, and identify significant differences among various population groups (EPAS Competency 2,3,5)
2. Discuss the impact of diversity dimensions such as ability, age, class, color, culture, ethnicity, family structure, gender (including gender identity and gender expression), marital status, national origin, race, geography religion or spirituality, sex, and sexual orientation across the life span. (EPAS Competency 2)
3. Discuss the influence of social, economic, geopolitical, and environmental factors on mortality and morbidity. (EPAS Competency 2,3,5)
4. Discuss the ethical and social justice implications of differences in mortality and morbidity across population subgroups. (EPAS Competency 1,3,5)
5. Compare concepts and definitions of health and disease, including their evolution, strengths, and limitations, as well as the implications for social work and social welfare. (EPAS Competency 2,3)
6. Identify biological, socioeconomic, cultural, and behavioral risk and protective factors for health, disease, and quality of life across the lifespan. (EPAS Competency 2,3)
7. Explain the impact of poverty, discrimination, and privilege on health status and disease outcomes, including the ethical and social justice implications. (EPAS Competency 2,3)
8. Discuss the implications of concepts of health and disease for health promotion, disease prevention, treatment, and rehabilitation. (EPAS Competency 2,3)
9. Describe current theories and models of health behavior (e.g. substance use, smoking, exercise and nutrition) and their implications for health promotion, disease prevention, treatment, and rehabilitation (EPAS Competency 4)

10. Describe socioeconomic, cultural, and religious differences in health beliefs and practices, utilization of health services, and barriers to care. (EPAS Competency 3, 5)

11. Describe stress, strain, chronic illness impact health, coping, and adaptation as they relate to health and disease across the lifespan. (EPAS Competency 3, 4)

d. Course design
This course will be held in-person. In the event that class needs to switch to virtual due to COVID-19, it will be done using a combination of asynchronous and synchronous activities. Asynchronous activities are those activities you will participate in outside of class time, which may include reviewing brief recorded lectures, articles, and/or other materials, posting on discussion boards, working in groups, and completing assignments. During class sessions, activities may include brief lectures but will mostly focus on application through small and large group discussion of readings and/or case studies and guest speakers.

e. Curricular themes
Multiculturalism and Diversity will be addressed throughout this course and will be highlighted in content related to cultural differences in health beliefs and health behavior and the role of protective factors and social support in health status and disease outcomes. The key diversity dimensions will be examined as they relate to health beliefs and health behavior. Social Justice and Social Change will be addressed in content on differences in mortality and morbidity in population subgroups and access and barriers to care. Promotion, Prevention, Treatment, and Rehabilitation will be addressed through content on concepts and definitions of health and disease, theories and models of health behavior, and stress, coping, and adaptation as they relate to health and disease across the life span. Behavioral and Social Science Research will be presented throughout the course and will include findings from epidemiology, demography, medical sociology, health psychology, medical anthropology, social work, public health, medicine, nursing, and health services research.

f. Relationship to social work ethics and values
This course will address ethical and value issues related to behavioral, psychosocial, and ecological aspects of health and disease. The NASW Code of Ethics will be used to inform practice in this area. Special emphasis will be placed on issues related to health care and the social worker's responsibility to promote the general welfare of society. In addition, ethical issues related to working with various client systems will be reviewed, such as confidentiality, privacy, rights and prerogatives of clients, the client's best interest, proper and improper relationships with clients, interruption of services, and termination.
g. Intensive focus on PODS

This course integrates PODS content and skills with a special emphasis on the identification of theories, practice and/or policies that promote social justice, illuminate injustices and are consistent with scientific and professional knowledge. Through the use of a variety of instructional methods, this course will support students developing a vision of social justice, learn to recognize and reduce mechanisms that support oppression and injustice, work toward social justice processes, apply intersectionality and intercultural frameworks and strengthen critical consciousness, self-knowledge and self-awareness to facilitate PODS learning. Specifically, this course addresses the following competency domains and competencies:

Social Justice Vision and Actions
- Identify and implement steps towards social justice in specific practice contexts.
- Use processes that promote social justice, including those that resist and reduce disempowering and marginalizing dynamics in specific practice contexts.

Conflict, Dialogue, and Community
- Demonstrate intersectional humility in communication and interactions with others.
- Assess the advantages and disadvantages of working collaboratively within and/or across groups (defined by positionality and stigmatized status) and act accordingly
- Initiate and promote dialogue/alliance/collaboration with others.

Critical Structural Thinking
- Analyze types, levels, and sources of power in practice contexts, theories and actions.
- Identify how inequities are manifested, maintained and reinforced in social systems, theories, processes, and social work practice of different types and levels.
- Recognize the impacts of privilege and inequities on various levels of social ecology (individuals, family, organizations, community, society).
- Value and use multiple ways of knowing and constructing knowledge.
- Understand how individual, family, group, community, organizational, nationality/citizenship history, culture, positionality, sources of power (ascribed and earned), and multiple ways of knowing shape perceptions, attitudes, cognitive processes, actions, and consequences.

Critical Awareness, Use of Self, and Strengthening Strategies for Resilience and Generativity
• Recognize one’s own positionalities on multiple dimensions, including nationality/citizenship (the relative power of the nation) and other insider/outside statuses.
• Recognize how these intersect with each other and change in interactions with others and in different contexts.
• Learning from those with different voices, values, and experiences, including different ways of knowing.
• Demonstrate knowledge and skills for intersectional humility.

2. Class Requirements

a. Text and class materials

The full book is available for download for free through the University of Michigan Library website.

Additional recommended and required readings will be posted on Canvas.

b. Class schedule

Assignment Descriptions (See Canvas for detailed instructions):

**IPE Module:** Students will complete an approximately one-hour long module that introduces the current state of the health care system from the perspectives of a patient and provider. It then provides an overview of the history of interprofessional education and how it relates to the quadruple aim of healthcare: improved patient experience, improved population health, increased workforce satisfaction, and reduced cost of health care. This module includes several reflection activities. After reviewing the module, students will complete a brief (max one-page double-spaced written with 12-point font with 1” margins) reflection in response to three prompting questions.

**IAT Assessment:** Students will choose at least one Implicit Associations Test (IAT) to complete and write a brief (max 2 pages double-spaced written with 12-point font with 1” margins) reflection in response to five prompting questions.

**Pharmacy In-class Presentation:** Students will complete a 15-minute presentation in teams of 3-4, focused on pharmacologic interventions. One group each will be assigned to explore either: pharmaceutical assistance programs, sexual functioning pharmaceutical side effects, pain medications, overview of prescription terminology and prescribing information, or application.

**Anatomy of an Illness Paper:** Students will complete a two-part assignment in order to gain an understanding of the nature and distribution of a particular physical, mental or behavioral health problem, the etiology of the health condition, its prognosis and treatment, noted social determinants and health disparities in these dimensions and the experience of the illness. Students’ paper will examine issues of the behavioral, psychosocial and ecological aspects of the health problem, with focused attention to the role of social work/your discipline in addressing micro and macro features of the health problem. The project will be submitted in 2 written papers.

**EXTRA CREDIT- Health in the News:** Students may opt to present a relevant, current news article for extra credit. See Canvas for more information.

d. **Attendance and class participation**

In order for us all to benefit from the knowledge and perspective of each individual class member, it is imperative that we all attend and participate in class. This is particularly true when in a virtual classroom environment. In order to maximize class participation and interaction, I encourage you all to attend each class and to complete all asynchronous learning prior to class. For any virtual classes, I ask that you participate with your camera on (if there is a physical or health reason, why this is not possible, please e-mail or call me to discuss).
Life does happen, and there may be times when you need to miss class. If so, please call or text me in advance of class. It will be your responsibility to complete any make-up assignment and submit it to me prior to the next scheduled class period. If you miss more than two classes unexcused, your final course grade will be impacted by at least one full letter grade. Three or more missed classes may result in an incomplete or failing grade. If there are extenuating circumstances, please be in contact with me throughout the semester.

e. Grading

Assignments throughout the semester are weighted (see above), with grades assigned according to percentage totals as follows:

100% - 95% = A  
94% - 91% = A  
90% - 88% = B+  
87% - 85% = B  
84% - 81% = B  
80% - 78% = C+  
77% - 75% = C  
74% - 71% = C  
70% - 68% = D+  
67% - 65% = D  
64% - 61% = D  
60% and below = E

A grade suggests mastery of material, inclusive of both deep description and analysis. B grade suggests competence related to course material. C grade suggests familiarity with material and is not considered adequate for professional practice. D/E grades indicate deficiency and carry no course credit. I grades (Incomplete) are given in rare situations in which significant unforeseen, extraordinary, or compelling reasons prevent student completion of work AND there is a definite plan and date for completion.

Students are responsible for initiating advanced contact with the instructor to request an incomplete grade and to establish a specific plan for completion. If no contact has been initiated by the student with the instructor regarding incomplete work and/or no specific plan has been established to complete work by the last day of class, a grade will be given based on the work submitted thus far. This may potentially result in a grade which carries no course credit. If students are concerned about their class performance or grade, the professor is willing to work with them to help improve their understanding of the class material or the assignments prior to the end of the semester.
Students are strongly encouraged to communicate with the instructor regarding questions, comments and concerns about their grades before using other approaches. To grieve grades, a student can follow the procedures listed in the Student Grievance Procedures. Other resources related to the school’s grading policies include the Policy for Grading in Special Circumstances and the Testing and Grading page from the Center for Research on Learning and Teaching (CRLT).

Late Assignments / Exams. If you foresee challenges to submit an assignment or to attend the mid-term and/or final exam, a formal request on Canvas or through E-mail needs to be made to the instructor at least 72 hours (3 days) in advance of the due date. The student is expected to meet with the instructor to discuss reasons for an extension or an alternative exam date. Any request for late assignments or exams within 72 hours (3 days) of the due date will not be accepted unless under special circumstances at the discretion of the instructor.

...
information, you may stipulate that you do not want it repeated outside of this class. Course content and perspectives may, at times, require us to engage information that is challenging to us and requires that we move out of our 'comfort zones'. As the instructor for this course, I am committed to encouraging each of us to explore new and challenging ideas and issues, while maintaining a respectful, civil, safe and supportive environment.

**Accommodations for Students With Disabilities:**
If you think you need an accommodation for a disability, please let me know early in the term. Some aspects of this course, the assignments, the in-class activities, and the way the course is usually taught may be modified to facilitate your participation and progress. As soon as you make me aware of your needs, we can work with the Office of Services for Students with Disabilities (SSD) to help us determine appropriate academic accommodations. SSD (734-763-3000; [http://ssd.umich.edu](http://ssd.umich.edu)) typically recommends accommodations through a Verified Individualized Services and Accommodations (VISA) form. Any information you provide is private and confidential and will be treated as such. If there are any circumstances and/or adaptations that are required for instruction or the classroom situation, please consult me.

**Religious Holidays and Academic Conflicts:**
From the Provost’s Office: Although the University of Michigan, as an institution, does not observe religious holidays, it has long been the University’s policy that every reasonable effort should be made to help students avoid negative academic consequences when their religious obligations conflict with academic requirements. Absence from classes or examinations for religious reasons does not relieve students from responsibility for any part of the course work required during the period of absence. Students who expect to miss classes, examinations, or other assignments as a consequence of their religious observance shall be provided with a reasonable alternative opportunity to complete such academic responsibilities. It is the obligation of students to provide faculty with reasonable notice of the dates of religious holidays on which they will be absent. Such notice must be given by the drop/add deadline of the given term. Students who are absent on days of examinations or class assignments shall be offered an opportunity to make up the work, without penalty, unless it can be demonstrated that a make-up opportunity would interfere unreasonably with the delivery of the course. Should disagreement arise over any aspect of this policy, the parties involved should contact the Department Chair, the Dean of the School, or the Ombudsperson. Final appeals will be resolved by the provost. Please notify me if religious observances conflict with class or due dates for assignments so we can make appropriate arrangements. Additional School and University policies, information and
resources are available here: https://ssw.umich.edu/standard-policies-information-resources.

Additional School and University policies, information and resources are available here: https://ssw.umich.edu/standard-policies-information-resources. They include:

- Safety and emergency preparedness
- Mental health and well-being
- Teaching evaluations
- Proper use of names and pronouns
- Accommodations for students with disabilities
- Religious/spiritual observances
- Military deployment
- Writing skills and expectations
