Post-doctoral training through the Transdisciplinary Training in Addictions Research (TranSTAR) T32 program, jointly directed by faculty at the Brown School and the School of Medicine at Washington University in Saint Louis, is available for a post-doctoral trainee, beginning immediately. This is a two-year in-residence post-doctoral opportunity designed to produce researchers who have state-of-the-art knowledge of addictions research, including alcohol, tobacco, licit/illicit drug use and gambling disorders. Applicants should be highly motivated, have recently obtained a doctorate in social work, public health or a related discipline, and must be a U.S. citizen or permanent resident. Women and underrepresented populations are strongly encouraged to apply. The TranSTAR T32 program, funded by NIDA since 2002, has been renewed through 2023. Trainees will: develop skills in research project development; author and co-author scholarly publications based on high quality research data sets collected or maintained by faculty mentors; participate in interdisciplinary curricula in such fields as Social Work, Public Health, Psychiatry, Biostatistics, Genetics, and Economics; work with expert local mentors; attend national addiction, social work, and public health conferences as learners and presenters; and engage in hands-on instruction from experienced investigators in preparation of grants for external funding, including submission of their own research proposals.

To apply: submit a cover letter stating your research interests along with a CV, 3 letters of reference and a writing sample to: postdoc@brownschool.wustl.edu. The application review begins immediately and will continue until the position is filled.

For more information: Please contact Hope Withrow, T32 Program Coordinator or the co-directors of TranSTAR: Dr. Kathleen Bucholz, Washington U. School of Medicine, bucholzkk@WUSTL.edu and Dr. Renee Cunningham-Williams, Brown School, williamsr@wustl.edu.
