NIH-Funded Postdoctoral Scholar Position Available
College of Public Health
Starts January 2020*

Dr. Stephanie Marhefka, Professor and Assistant Dean for Research, is seeking applications for Postdoctoral Scholar position working on her National Cancer Institute funded R01 clinical trial (R01 CA243800):

The Positively Quit Study

This five-year attention-matched randomized controlled trial will test a group-based Social Cognitive Theory-informed smoking cessation intervention designed specifically to help people living with HIV quit smoking. The control intervention will be a healthy living program for people living with HIV.

Minimum Qualifications:
- Ph.D. in public health, psychology, or related discipline;
- Experience with human subjects research
- Excellent interpersonal skills

Preferred Qualifications:
- Experience working in the areas of: HIV prevention and/or care, biobehavioral approaches to HIV, biobehavioral smoking cessation interventions, community-engaged research, or implementing clinical trials;
- Experience working with interdisciplinary teams in a health promotion/care capacity;
- Strong oral and written communication skills;
- Highly motivated, self-directed
- Comfort with calling and speaking with a diverse array of research participants
- Interest in health equity

ESSENTIAL FUNCTIONS OF POSITION:
- participating in the conduct of the randomized controlled trial, including but not limited to activities related to trial planning, recruitment, enrollment, managing participant engagement, overseeing community advisory board activities, assessing fidelity, analyzing data, writing reports and manuscripts, and presenting findings to local, regional, and national audiences;
- supervising and mentoring undergraduate and graduate students related to the conduct of the trial;
- traveling locally to meetings and activities related to the trial; and
- traveling throughout the state of Florida—including overnight travel for up to 4 nights/trip—to attend meetings related to the trial.
