UroEPI Career Development Program
University of Michigan

UroEPI Overview
The UroEPI Career Development Program at the University of Michigan Department of Urology is designed to prepare clinicians and/or epidemiologists interested in benign urology for an independent research career. This fellowship is supported by the NIDDK K12 program and provides 2 years of post-residency/graduate training to acquire the necessary skills for the conduct of high quality epidemiologic research. Year 1 consists of coursework towards a Masters degree in Public Health/Epidemiology for clinicians or a postdoctoral certificate in Translational Research for PhDs; all tuition is paid. Fellows have access to all necessary support staff and mentors. There is an option for a clinical fellowship at the completion of the training program. This clinical year can be added to meet the necessary training requirements of the respective specialty societies.

Eligibility Requirements
Applicants for this training program must:
1. Be committed to an academic research career in Urology or Epidemiology
2. Be highly regarded by those responsible for their training
3. Clinical applicants should have completed an ACGME-approved residency by the time they start. PhD applicants should have completed their doctoral program in the health sciences
4. Be a U.S. citizen or permanent resident

Application Process
All applicants will be required to submit their current curriculum vitae, along with at least three letters of support, and the completed application. Applicants that receive a favorable review will be invited for an interview at which time official copies of undergraduate and medical school transcripts should be submitted. Requests for more information and an application should be directed to:
